

**NAME OF STUDENT:** Etim Faith Paul

**NAME OF SCHOOL:** Comprehensive Secondary School Apani, Rivers State

**CLASS:** J.S.S 3

### **WHAT IF I COULD INVENT SOMETHING NEW?**

If I could invent something, why can't I invent something that can prolong life, why can't I invent something that can read mind, why can't I invent something that can bring back our love ones, invent something that can be an addition to life, people say that things are difficult, something that can make things easier for man, people cry because of one thing or the other, invent something new to them that will make them to be happier in one way or the other, man is finding it difficult when it comes to agriculture, why can't I invent something that can make man to say it and it just happens. This world is full of corruption, why can't I invent something that kills corruption, people fall because there is no one to back them up, why can't I invent a backup for man so that they cannot fall but keep going, before a man can plant, he needs to go into some work that's stressful, why can't I invent something on my own that can make the stress of man go away in a twinkle of an eye, In the construction of roads and building of houses man has to go into work, why can't I invent something that can make the construction and building of houses easier without waste of time, energy, and power to do it, people cry because it is difficult to survive, why can't I invent something that can make man ease stress, reduce energy, and power before he or she can survive. Time waits no one but someone waits for time, why can't I invent something that time wait for, people says life is difficult, why can't I invent something that can make life easier and reliable for man, why can't I invent something that is faster, powerful than man, why can't I invent something that brings man to the beginning of success, why can't I invent something man can use and keep for history, why can't I invent something that can make man to say "she did it " if I could invent something new "I will make the world a better place " if I could invent something that can change the world, I will first think of a machine, something that can be an assistant to man because what man cannot do a machine can do better, a machine is something that can work throughout a day without any complain and it works easier and faster in no time, the use of machine brings someone to the finish line and it is a help to man, a machine is the one that can bring the reliable energy and power that a man needs to success, a machine is something that can take the pressure of man to an end, And that is why I say "A Machine Is The Best Invention That Can CHANGE And TURN The world Around For The SUCCESS And wellbeing Of MANKIND "
