

## **IF I COULD INVENT SOMETHING NEW**

If I could invent something new, what would it be? What would I invent that would change the world? All the famous inventors, how did they know what to invent? The fact is, how will I put everything in order to coordinate what they are doing?

I wonder if I could invent a Holographic device that can display and control some electric devices, which would help mankind a lot. How will I get some of the equipment to help me invent what I want to achieve, so that it can benefit man and his environment?

If I were given the permission and equipment to build something new, I would build a Holographic watch, lens, and other gadgets that would help mankind. In the process of creation, it may have many features, which include:

- Displaying important information such as time, weather, and news
- Controlling electronic devices such as lights, TVs, and computers
- Providing a virtual assistant for daily tasks and reminders
- Offering a platform for virtual communication and entertainment
- Helping people with disabilities and special needs

In conclusion, inventing something new would be an incredible experience, allowing me to make a lasting impact on the world. I would be proud to be known as a talented inventor, and I am excited to see what the future holds. Who knows what amazing inventions await us? With determination, creativity, and the right resources, I believe I can create something truly remarkable and make a positive difference in the world.
