

If I could invent something new

- ❖ *What is invention-* *the ability to think of new and clever ideas*

If I could invent something new it would be something that would change the world. I would invent something that would make the world better. If I could invent something:

- ❖ *I will invent a car that doesn't need fuel only batteries*
- ❖ *I will invent a machine that will make people to stop doing evil*
- ❖ *I will invent a visualizer chair*
- ❖ *I will invent an airplane with rooms and kitchen*
- ❖ *I will invent plates that can't be broken*
- ❖ *I will invent a biro that the ink never runs out*
- ❖ *I will invent a board that can clean on its own*
- ❖ *I will invent an elevator that can only open after unlocking it with your face*

I would love to have invented a well developed robot that can perform human works but the purpose of my invention is to make man work a bit easy and less stressful . if robots existed it would make humans very lazy because what is the need for working when you have a machine to do everything for you it is a very big disadvantage allowing a machine to help us to do what we are meant to do it will make us lazy and not to work again . some people invent things for their own selfish purpose but I on the other

hands want something that will not only benefit me but the world at large, I would love to invent something that would give the world a better light

- *I would want to invent something that would make people amazed*
- *I would want to invent something tremendous*
- *I would be glad to invent something that will change the world*

In conclusion, invention is a great thing it comes hand in hand with knowledge. Our past investors invented a lot of things we use today from the phones, calculators etc. if our upcoming generations were not lazy and not in a hunt for easy money . I believe that we can do and will do better. A lot of things has been invented and there is still more that can be invented if we just have to look around and see a problem . Invention is not only creating things it is also about bringing up ideas to solve a problem . I wish to solve a problem one day . a lot of things are yet to be invented by investrous people . people with are always looking for new things to create . I will also love to invent a cctv camera watch , a teleportation device , a glass tiles that can't be broken , a glass gate, inventing is also a craft , one day I would love to invent something that will be very useful in the society today . I want a lot of things to be made.
