

STUDENT NAME: UBOCHI CHUKWUNONSO COLLINS
NAME OF SCHOOL: UWANI SECONDARY SCHOOL, UWANI, ENUGU
CLASS: JSS2B

Essay Topic:
IF I COULD INVENT SOMETHING NEW

In my today's world, where neglect of basic education is the status quo, and whereas no sustaining system of quality basic education is laid down to bring out the innovative minds of children in the society.

Often during my Christmas travels to my village, I do see children both my age, older and younger who have been totally out of school, undeveloped and neglected, and having to speak with some has led me to know they were out of school due to numerous reasons owing to financial, health, domestic reasons and they don't even wish or have the readiness to go back to school because they have already lost what it feels like to be in school.

If I could invent a child focused knowledge special centre that will work on the minds of these children and equipping already out of school children on ways to developing a mind-frame for innovation. The centre will provide to these children, guidelines in any specific area of life and generally seek to imbibe back the spirit of pursuing education in the minds of these children. Child specialists who will be more concerned with child's growth and development will be in charge of running the centre. Eventually these children will be put back to schools through a partnership with the centre, Heirs Insurance, and my village members; with Heirs Insurance guaranteeing the education of the children up to secondary school level which will funded by the community thereby putting the responsibility of every child's growth and development in the hands of the village members resulting in a change in the mindset of the children on education.

My vision for the centre is that it will become a place of motivation and finally through it access to quality education is guaranteed in my village.
