IF I COULD INVENT SOMETHING NEW

Having known that there is no river with no source the main purpose of writing this essay is to discuss how I will invent something new.

What is invention? According to Cambridge Advanced Learner's Dictionary, invention is something that has never been made before, or the process of creating something that has never been made before.

We have inventors who had made good devices that help people. Examples of inventors and their inventions are shown below.

-Thomas Edison invented electric light bulb.

-Alexander Graham Ben invented telephone.

-Wilbur and Orville Wright invented the airplane.

-Alfred B. Nobel invented dynamite.

-Bartolomeo Cristofori invented piano. and

-Josephine cochrne invented dishwasher.

If I were to invent something new, it would be a robot called Devika321self. It will be powered by battery to help with hygiene, wash your hair, massage your body, it will help in cleaning the house. It will function to help those who have fatigue.

Devika321self will help the society by making work easier and faster, it will help to massage the body when feeling tired, it will help to sweep and mop.

I will make the whole world know about my invention through social media, Facebook, Instagram, Twitter, Youtube and Tiktok. Looking for potential sponsor and investor like Heirs Insurance that can invest in my invention and create good impact in my invention.

I will convince Heirs Insurance to support my invention because Heirs Insurance is an excellent enterprise. Heirs Insurance group's is commitment to its foundational principles is a crucial driver of its impressive financial performance. Heirs Insurance has gone from being a disruptive startup to an industrial leader. The unborn generations will benefit from the impact of my proposed invention. It will help them in making new devices and in making better invention.

To draw the curtain, I pray God will bless the Heirs Insurance Group and guide it to the right path.
