

NAME: IBEROSI IJEOMA
ADDRESS: 34 OYEBO STREET APAPA LAGOS
SCHOOL: MAVIR LEADERS COLLEGE
TOPIC: IF I COULD INVENT SOMETHING NEW

My name is Iberosi Ijeoma, my essay is if I could invent something new. If I had a chance to invent something new which would be very beneficial for mankind it would be a flying car. In the past people use only on a horse or just on foot. After car was invented It changed everything radically. Nowadays cars are the most common means in this country. Basically, that why I would like to invent a flying car.

Firstly, my invention would help decrease drivers stress caused by traffic jams. As statics increasing in big cities as well as small ones. Especially, during business everyone needs something that we make their business grow. The combination of flying cars definitely would ridge the country in the result of this invention there could be decrease of car accidents and explosive device in the car, sometimes people don't realize that they violate the laws and break the rules because of reasons. In my opinion there is only one solution to these problems making a new flying car service should be available. And, it would be fun we have often met the concept of a flying cars in science fiction or Hollywood films. Obviously it is interesting and people would want to try it themselves. I would also like to invent other things so I can help people around the world live longer, I will like to invent a device that clean gutters so that the environment would be clean and have a very good drainage, Why I want to invent something new because I want to be like all this great people like Eli Whitney in the, year 1765-1825 he invented the catn-gin machine that separates seed, hulls and other unwanted materials from cotton after it has been tacked, Johannes gutter- berg in the year 1394-1468 he invented a printing machine named gutter-berg press and lastly John Logie baird in the year 1888-1946 he was the inventor of mechanical television, why I want to invent new things in order to meet basic human needs and also to fulfill my own creativity desires many inventors are inspired by social and economic reasons by their desire to make life easier and more effective. And my invention will make tasks easier, Sustainable and entertaining to impact education as the key to financial success. My aim is to invent my new invention and also to be great like Johannes gutter- berg, john logie baird and so many other people. The part of this invention is the innovation and creativity. I would also like to invent a beneficial and portable thing in the society.

In conclusion, if I could invent something new, I would invent a lot of effective things that will make life so easy for the people and make everything radically in the society. With this few point of mine, my inventory would be useful in both big cities as well as small cities and my encounter with this massive invention will make a great statics invention.
