NAME: NNADI EMMANUEL CHINONSO

SCHOOL: MATER MISCERICORDIAE SECONDARY SCHOOL, PORT HARCOURT.

CLASS: JUNIOR SECONDARY SCHOOL ONE (JSS 3)

AN ESSAY ON THE TOPIC "IF I COULD INVENT SOMETHING NEW":

If I could invent something new, I would invent a machine that can make food appear out of thin air! This machine would be called the "Food Genie".

Imagine being able to think about your favorite food, and suddenly, it appears right in front of you. No more hunger, no more waiting, no more cooking! The Food Genie would make it all possible.

With the Food Genie, people would never have to go hungry again. It would be especially helpful for people who don't have enough food to eat. They would just think about what they want, and the machine would make it appear.

The Food Genie would also help to reduce food waste. If you don't like something, you could just think about something else, and the machine would replace it. No more throwing away uneaten food!

Additionally, the Food Genie would be very helpful during emergencies. If there's a natural disaster, and people are trapped, the machine could provide them with food until help arrives.

Of course, the Food Genie would have to be used responsibly. We wouldn't want people using it to eat too much or waste food. But overall, it would be an amazing invention that would make the world a better place.

In conclusion, if I could invent something new, I would invent the Food Genie. It would make food appear out of thin air, helping to end hunger and make the world a happier place.
