

Good Day sir/ ma

My name is Afolabi Khayrat

If I could invent something new: A vehicle that uses solar.

If I could invent a vehicle that uses solar power, it would revolutionize transportation and help combat climate change. My invention would be a car with solar panels integrated into its body, harnessing the sun's energy to generate electricity and propel the vehicle. This eco-friendly car would reduce our reliance on fossil fuels, decreasing greenhouse gas emissions and air pollution. Imagine a world where vehicles not only produce zero emissions but also generate their own fuel, freeing us from the constraints of gas stations and charging infrastructure.

So, with this few points I think it will make Nigeria citizens more happy and will make Nigeria develop.

Thank you for reading sir/ma.
