

IF I COULD INVENT SOMETHING NEW

If I could invent something new, I believe this is the thought that possessed the minds of many renowned scientist and inventors seeing needs and lacks that have either robbed men of their lives, made living miserable or not allowed men to live life to the fullest in different places and times.

This singular concern overwhelming their being has made them dare odds and today, we have a great life that we can live to the fullest. From bathing soaps, to toothpaste, portable healthy, drinking water, canned foods, clothing, umbrella to the more technical electricity, wrist watch, personal mobility (bicycles, roller-skaters ,skateboards, motorcycles, cars) trucks, boats, trains, aircrafts and spaceships, typewriters, laptops, papers, pens and pencils, printing machines and pharmaceuticals, not forgetting the computers, the internet, mobile devices, and so much more for the general ease of life, time-saving, health and well-being of individuals and the world.

Yet if I could invent something new, this statement has always been on my mind because when I hear of plane crashes, road mishaps, capsized canoes or sunken ships, I think is there no way that these catastrophes leading to great loss of lives and properties of fellow human beings can be averted by little inventions or the push of a button to save precious lives?

I would like to invent such that should be used to prevent more unnecessary deaths, and loss of properties from happening. I also think of the situation where people die of hunger because food cannot get to those places and are left to rot elsewhere also because they are not so productive due to desertification. I would also like to invent a contraption that can transform the soil and improve weather conditions so that those places can be fit for farming and harvesting ripe and good fruits. I will invent a machine that is good enough to be bought by the countries where unfavourable weather rules the land.

I will create a chemical that wipes away all sicknesses, and diseases from the world. If I can invent something new, I will invent what will stop global warming. If I can invent something new, I will invent what will stop desertification, I AM THINKING, and I believe someday, I WILL INVENT SOMETHING NEW for the betterment of humanity, because a wiseman once said, If YOU CAN DREAM IT,

YOU CAN MAKE IT, because THE SKY IS JUST OUR STARTING POINT.
