IF I HAD THE CHANCE TO INVENT SOMETHING NEW

If I had the chance to invent something new which would be beneficial for human, It would be 'CARS WITH HANDS AND LEGS'.

In the olden days, people traveled only on horses, camels or just on foot. After cars were invented, it changed everything easily. People started to use cars more than the previous means of transportation. Nowadays, cars are the most common means of transportation. The number of traffic jams has increased with the use of great numbers of cars. Mainly, that's why I would like to invent a walking car with arms and legs.

Firstly, My invention would help to decrease driver's stress, Especially during business hours when one is in a hurry, trying to get to their workplace and encounters massive traffic jam. Some people would prefer to drive cars with legs and cars to walk over other cars during traffic jam instead of ordinary cars. The invention of cars with legs and hands surely would help to get rid of traffic jams.

Secondly, Due to this invention, there could be a little decrease of car accidents and consumption of fuels. Sometimes, people would violate the laws and break the traffic rules

Some people violate the law because they are In a hurry which they would try to overcome different traffic problems like road construction, crowd of people. In my opinion, there is only a solution to these problems. Cars with legs and hands service should also be available in other countries and not only in Nigeria.

Lastly, it would be so exciting. We have sometimes met the concept of cars with legs and hands in cartoon or action movies. Obviously, it will be interesting to see and people would prefer it to the ordinary car and would want to try it themselves.

In conclusion, I would like to change this stressful atmosphere. Actually, some people wastes time in traffic. Instead of that, they can spend time with family and friends. This invention would be very beneficial to human and reduce stress in their day to day activities.

This is what I would like 'IF I HAD THE CHANCE TO INVENT SOMETHING NEW.
