

# TOPIC: IF I COULD INVENT SOMETHING NEW

## Marvelous Creations

What do we mean by creations, from the word "creation" we can get creativity.

Creativity is a sense of finding and developing something new, in a sense of finding your inspirations and making them come true. That is the explanation of creation.

It is not compulsory for an invention to be something to help lives in need, but the main idea of an invention is to develop the society and the world in various ways, like artificial intelligence doing the work of doctors, and so on. There are other inventions that don't really help in daily life majorly like vaccum cleaners, most institutions like schools, offices, events and so on, don't use this item but instead use brooms which are common.

My dream was to always create an ETR (energy time ring) the main idea of this invention is a solar ring that show time holographcally and substandardly, by what i mean it will both show in a holigram and on the body of the ring. So the main idea for the ring it's to able to give out data like what a typical wifi would do. It will also tell the blood pressure of an individual. Well the first idea of people reading this will think it not that useful, main idea of this dream is to make all the rings in pure gold, so to make it very expensive for only people that can afford to buy it.

The design is that the ring glow in pure darkness emmitting a bright-dime light for people to see, it also serves as a self tracker, people who are lost can be traced through the ring.It is also going to contain a decomposition of reformed iron, for the ring to be effectively durable for long periods of time.

The ring will serve as a voice recorder and secret camera for spying or keeping important details, just like an all in one package for people who are interested in this gadget, accessory, spy tool, watch and so on.

This dream is a hope of our future but not of now, I am hoping for this dream of mine to become a reality as soon as possible, for the progress of children with imaginations to pursue their dreams and make the world a better place.
