

IF I COULD INVENT SOMETHING NEW

Invention is the act of bringing ideas or objects together in a new way to create something that did not exist. There are many inventors, for example: Thomas Edison invented photograph, the electric light bulb, the telephone, Benjamin Franklin invented lightening conductor, bifocal lenses and Leonard da vinci invented helicopter and the battle tank. All these men were able to achieve all these because they were focused on their goals. This has challenged me to think that if I had a chance, I will also invent something new which would be very beneficial to mankind, and that would be a 'flying car'

In the past people travelled only on a horse or just on foot. After car was invented, it changed everything radically, people started to use cars more than any other means of transportation. Nowadays cars are the most common means of transportation. The traffic jam has increased with the use of great numbers of cars. Basically that is why I would like to invent a 'flying car'.

Firstly, my invention would help to decrease the stress of drivers caused by traffic jam. As statistic shows traffic jam are increasing in big cities as well as the small ones. Especially during business hours when everyone is in hurry to get their work places early and unexpectedly encounter massive traffic jam, some people would prefer to drive flying cars instead of ordinary cars. Like I myself, I want to become a medical doctor, I will like to leave my home early enough and unexpectedly I encounter a massive traffic jam because of people going to school and work places. It would not be that easy. So if I am able to invent a flying car, it will make my transportation easier and faster. The combination of ordinary and flying cars definitely would help to get rid of traffic jams.

Secondly, in the result of this invention there could be decrease of car accidents. Sometimes, people do not realize that they violate the laws and break the traffic rules because of a lot of reasons. They violate the laws because they are in a hurry, they are trying to overcome different traffic problems like road construction, narrow street, crowds of people, etc. In my opinion there is only one solution to this problem. Flying car services should also be available.

And finally, it would be a fun. We have often met the concept of flying cars in science fiction or Hollywood films. Obviously, it is interesting and people would want to it by themselves.

In conclusion, I would like to change this stressful atmosphere. Actually people waste time in traffic jams instead of that, they can spend more time with their families and friends. This invention will be beneficial for people to avoid stress and enjoy travelling.
