A BG TRANSFORMER

If I could invent something new, it would be a small box that could transform into different things like a robot, a plane, a ship, a car, a table tennis and so on. I would call it a **BG Transformer**. What is the reason for this new invention? Plane tickets, cruises, and fuel for cars and vehicles, land for houses, games for children are too costly. Even though this new invention is costly too, it would solve a lot of problems in the country. For example, if there is traffic and you are running late for work, why waste time? Transform your car into a plane and get there in two minutes. You want to go on vacation with your family and cruises are too expensive, why worry? Transform your car into a ship. There should be a new invention in town that would save time, money and energy. This will be a solution that will make people's heads to turn to see the newest invention in town: The BG Transformer.

Let me begin with the cars that it can transform into. A BG Transformer car 1000 can turn into: Only a car, a ship, or plane. A BG Transformer 1000 assistant is just like a BG Transformer, but has a female robot voice. It also has the ability to assist the driver and the passengers with things like drinks and water, directions, food, medical support, games and so on. A BG Transformer 2000 can turn into a car and a plane, a plane and a ship, or a car and a ship. A BG Transformer 2000 assistant, is also like a BG Transformer 1000. And also has a female robot voice. In addition to assistance to the driver and the passengers with things like drinks, water, directions, food, it also provides medical support. A BG Transformer 3000 can turn into a car, a plane and a ship. A BG Transformer 3000 assistant, is also like a BG Transformer 3000. It can also assist drivers and passengers with special features like window blinds, auto drive, medical support, water, food and so on.

The BG Transformer can also transform into a robot, that would look like a human. The same brain, the same stature and will also be able to perform human tasks. It will also be able to transform into an animal. People who have the money should be motivated to buy the inventions.

These inventions are important because of the money it will inject into the economy. In view of this, I have decided to help in my own little way. If we call ourselves patriots, but sit at home or at work doing nothing for our country, then we are fooling ourselves. So, let us do something for our country, let us make our parents proud, let us make Nigeria proud, let us make ourselves proud and most importantly, let us make God proud.
