If I could Invent something new  
A house building machine

To invent means to create what has never been invented before seen I imagine a world where people do not have to sleep on the road.

If I was to invent something new it would be a house making machine. So people don't have to spend Billions and Millions building houses. They can easily turn on the machine and ask for any house they want.

People all round would love to live in a beautiful, fancy house, houses decorated as to taste. So that we don't have beggars on the road looking for where to live.

And with this Nigeria may be developed. And people will no longer be homeless.
