**SCHOOL:** Heyik International School, Post Office Road Sabon Tasha, Kaduna

If I had a chance to invent something new which would be very beneficial for mankind it will be a flying car. In the past, people travelled only on a horse or just on foot. After car was invented it change everything radically. People started to use cars more than any other vehicle.

Nowadays cars are the most common means of transportation. The numbers of traffics jams has increased with the use of a great numbers of cars.

Basically that's why I would like to invent a flying car.

Firstly, my invention would help to decrease drivers stress caused by traffics jams. As statics shows traffic jams are increasing in big cities as well as small ones. Especially, during business hours when everyone is in a hurry trying to get to their place of work and unexpectedly encounter massive traffic jams. Some people would prefer to drive flying cars instead of ordinary cars. The combination of ordinary and flying cars definitely would help to get rid of traffic jams.

Secondly, in the result of this invention there could be decrease of car accident. Sometimes people don't realize that they violate the laws and break the traffic rules because of a lot of reasons. They violate the laws because they are in a hurry, they are trying to overcome different traffic problems like road construction, narrow street, crowds of peoples etc.

In my opinion there is only one solution to this problems.

Flying cars service should be also available.

And finally it would be fun. We have often met the concept of flying cars in science fiction of Hollywood films.

Obviously it's interesting and people would want to try it themselves.

In conclusion I would like to change this stressful atmosphere. Actually, people waste time in traffic jams instead of that they can spend more time with their family or friends. This invention would be very beneficial for people to avoid stress and enjoy traveling.

This new car would make our life a little bit easier. People who live in big cities like Abuja would have opportunity to spend more time with their family, friends and well wishers. It would help for businesses to minimise time wastage. It would reduce expenditure on building road and the bridges. I hope someone out there is working on this project at this moment and we will use such cars someday sometime. So that we this generation won't suffer like our parents suffer in their own generation.
