

## IF I COULD INVENT SOMETHING NEW

My Name is Iroko Ezekiel, I am 16 Years old, a student of Mobolaji Bank Anthony Junior High School and I am in JSS 2. The beginning of an invention begins by dreaming about it and personally, I have many dreams. If I could invent something new, it would be something that would make an impact in the society. I would invent a Water car. A car that uses water as fuel instead of fossil fuels such as gasoline or natural gas.

First of all, cars play an important role in our everyday life. Cars have become the essential piece of our day-to-day conveyance. Going to work, doing groceries or just transporting from one place to another are example of how we use this kind of transportation. In the place where I live, public transportation is an uncomfortable choice to travel from one place to other, therefore the use of automobiles as a personal way to transport are very used. I dare to say we depend on this kind of transportation; we depend of its comfort and its privacy.

Secondly, cars play an important role in our everyday life, the increase use of cars have resulted in the increase of air pollution. This consequently results in the increase of respiratory diseases as well as the loss of healthy ecosystems. The importance of air pollution is high throughout the world and people try to find a way to reduce this in the manner a "Water Car " would be precursor of this.

Lastly, beyond the importance of cars in our everyday life and also the fact that the increase use of cars has resulted in the increase of air pollution, I strongly believe that “Water cars” would be an important innovation difficult to resist, this is due to the fact that water is deeply cheaper than fossil fuels. In the beginning water car, may be more expensive, but it will be an important investment for our life, just image how cheap it will be to travel from one place to another using this kind of transportation.

To sum up, I strongly believe this invention will be a turning point in the way we see transportation, this will bring with itself a lot of benefit for our society such as the reduction in market product's cost and the encourage of touristic places.
