

IF I COULD INVENT SOMETHING NEW

What is invention?

According to wikipedia an invention is a unique or novel device, method, composition, idea or process.

An invention may be an improvement upon a machine, product or process for increasing efficiency or lowering cost.

Example is: electric cars, radio, rocket engine, radium.

I will like to invent an (SDD) a smart watch that can detect disease which will help in the impact of the society to benefit mankind and there will be no more diseases like heart disease, movement disorder and signs of covid 19.

It will collect data from individual sensors, such heart rate and skin temperature to detect changes psychology signals. It devices is utilize a technique called photoplethysmography accurately measure the user heart rate. Its generally struggles to accurately track metrics like blood pressure and quality of your sleep, it will be use for detecting cardiac dysfunction, it will also help manage chronic diseases like hypertension or diabetics by monitoring crucial health parameters. It will be a helpful tool for individuals seeking healthier life styles.

It will be use to research heart, respiratory, neurological and liver diseases as well as gynecological conditions, setting cancers, diabetics, sleep quality, autism and mental illness. Its track your daily sleep count and include working 10km step per day.

In conclusion if I grow up I will like to invent an SDD.

Thanks
