**ESSAY TOPIC:**

**“IF I COULD INVENT SOMETHING NEW”**

If I could invent something new, I would invent a device that will improve Agriculture growth in Nigeria. The device which I will call the “Gran Planter” will have the ability to plant seeds, detect pest that decreases crop growth and survey the farm land. The Gran Planter would be a machine with advanced technology,

The farmers would have the ability to do lesser work on the farm. The Gran Planter will be programmed to protect the farm no matter what the intruder’s do, the farm lands will be protected and secured.

Moreover, the Gran Planter would have the potential to improve people’s life and farmers in profound ways. Crop yield increases and those in remote areas will have abundant food to eat. The Gran Planter provides the soil with nutrients, helps the crop to grow well, free from pest, arrangement of ridges, water the crop as well as uprooting the weed and thinning the weaker plants for maximum yield of crop. Human labour will be minimal and have lesser work to do in the farm.

However, the Gran planter would raise important questions from individual’s imagination how would we ensure the safety and quality of the created machine? What would be the implication of creating the machine base on Agriculture only? The answer is simple, the safety of the machine will be ensured by testing rigorously, and certification processes to ensure that the device meets international safety standard before it can be used on farm land. The implication of creating the machine will be addressed before put in place, likewise implement measure to ensure the devices compliment traditional farming methods, rather than replacing them. Individuals would also imagine the great exploit that Gran Planter would be in the economy. The Gran Planter would increase crop yield leading to improve food, security and reduce import.it can also boost Nigeria foreign exchange earnings.

The possibilities of the Gran planter would be endless. The device will revolutionize Agricultural farmlands and transform the country for good.

In conclusion, the Gran Planter would be a ground breaking invention that will bring potential benefits, transformative especially Nigeria my Country, and it would undoubtedly change the world for better.
