SCHOOL NAME: REHAMA ACADEMY
CLASS: J . S . S . 2
ESSAY TOPIC: IF I COULD INVENT SOMETHING NEW.

If I could something new, it would be a cooking machine. It would be like a machine that cooks food on its own without the food being burnt. The machine stops cooking immediately the food is done.

Firstly, cooking machine is a high-performance machine and I would like to design it for kitchen use. My invention could be so useful! You don't have to visit the store. All you have to do is mention the kind of food you want to be cooked and done! I would design it especially for those who are disabled and has one or no leg who can't afford to walk or move.

Secondly, the machine comes right just like a washing machine 4 inch by 4 inch by 4 inch metal box, with a voice chrome which will be used to receive the food you mentioned. My invention would change the world especially for the disabled ones. Just mention the food you feel like eating and it cooks right straight up without you stressing yourself or even the food getting.

Thirdly, there are more disabled people ever than imagined and this is the reason why I would like to invent a cooking machine. People wish to cook faster. It happens when they are busy doing something else. I'm sure that this moment they think 'I wish I had a cooking machine to make cooking faster. It will help students to prepare food faster to avoid going late to school.

In conclusion, I believe my invention will change the world. And I also hope that my invention would go round the entire universe. This is why i would like to invent a cooking machine.
