IF I COULD INVENT SOMETHING NEW

I would like to invent a toilet washing machine. Some people find it difficult and stressful to wash and clean their toilet and that is one of the places they are infected with bacteria that cause diseases. This toilet washing machine is easy, and faster in washing and keeping the toilet clean.

Material needed for the construction:

- Small generator engine attached with constructed plastic container
- Moulded or machine iron ring
- Three fingered- wooden brush
- Toilet seat cover
- Detergent.

First step: Tight the moulded iron ring to the base of the generator engine then fix the three finger wooden brush on the shaft of the engine.

2nd step: Mount the engine on the seat cover bored to the circumference size of the three finger size brush.

3rd step: Put water and detergent in the container and start the engine to wash the toilet by itself.

Importance of toilet washing machine

- It makes the washing of toilet easier and faster
- It makes the toilet cleaned and neat
- It makes the toilet clean and hygienic
- It is the simplest way of washing toilet
- It prevent people from being infected
- It makes people fit and healthy
- With the help of this washing machine, people will look fit and healthy.

Disadvantages of toilet washing machine

- It is costly and difficult to afford
- It is risky when constructing
- It is stressful when constructing.

Why I decided to invent this machine is because many people are infected today with virus but I want to decrease the diseases with the washing machine so as to ensure good and clean toilet hygienic in our society and community. In this toilet washing machine many people are alive today. In Nigeria today some of us are being infected with various diseases such as bacteria, infections, fungi. A good hygiene is as good as anything. Toilet washing machine can also help protect you from germ free. Toilet washing machine is fastest means of washing toilet that no one could even think of inventing. Why I choose to invent it is because some people are infected through the toilet some of our youth has died because of this infection. If you use this toilet washing machine there is no need to stress yourself to wash or clean the toilet. You can on yourself construct it and it will be more beneficial to you there no need to stress yourself in working. It will make our country develop a good habit. In toilet washing machine , people works are easier and faster. In the old modern toilet people usually stress their self by washing the toilet and it will cause them diseases. In the traditional toilet people used pit to defecate or they may use bucket to defecate and they may be infected with diseases and it may lead them to death. That why we have to use toilet washing machine.
