

IF I COULD INVENT SOMETHING NEW

So many people have created a lot of things. People like Scientist, Farmers, Doctor and so much more. All these Invention are what we are using in our present day society. A lot of people talk about mind blowing ideas and I believe every single idea is unique. If people can create so many things, why can't I create mine? Well I believe anything is possible.

If I had such an opportunity, if I could invent something new what would it be? There are a lot of things one could invent but, I want something new, distinguished, different, something no one would think about. But what is it that no one had thought about?

I know it is a really fascinating question but I have an answer to it. If I could invent something new that would change the world, it would be a DISASTER DETECTOR DEVICE (DDD). A lot of people may think it is fiction and stupid but can one imagine a world without danger? Can you imagine a world without chaos and havoc?

My invention is capable of making the world a place without danger. The DISASTER DETECTOR DEVICE (DDD) would be small so that people can carry it to everywhere and anywhere they go. To charge it, you will use the sun because there is a solar panel attached to it.

I know that there are devices that detect disaster but, I found that they only detect natural disaster. The DISASTER DETECTOR DEVICE (DDD) can detect both natural and man-made disaster. It can also be used to detect any impending accident or bad thing that is being planned. If I create these disaster detector devices it won't be expensive so that both the rich and poor can afford it because bad things happen to everyone.

I believe that DISASTER DETECTOR DEVICE (DDD) can change the world for example in foreign countries where a lot of natural disaster happens, you can use the DISASTER DETECTOR DEVICE to tell when the disaster is about to happen and it would be able to tell you the necessary precautions you can take to avoid or prevent it.

Also, in our country Nigeria a lot of bad things happen with the help of the DISASTER DETECTOR DEVICE we can avoid all these things by knowing the thought of our elites who are out to swindle the nation of its wealth in the name of politics. The DISASTER DETECTOR DEVICE can help you avoid all things. This device is not just fantasy. It can be real and help mankind greatly.

If I had such an opportunity, I will invent this device and I will let the whole world know that there is a device that can let you know if anything is about to happen. So many people have died because of one thing or the other. All those devices that have been created for disaster are useful too but my invention will be able to detect all disasters not just one.
