School: EVERGREEN COLLEGE, ENUGU

Class: JSS 2

IF I COULD EVENT SOMETHING NEW

I want to create something new, a place where the unaccepted is accepted, where we all have a place to stay. It is said "Rome was not built in a day". Ever since childhood, I heard that 95.62% of the world were poor and they have brought organisations to stop it.

I want a home for the poor where they can all be accepted and welcomed in a place outside the real world. If I could create a place, I would call it a Cyber Base. Where AI works for the poor, the pregnant women can give birth without distress, enough food and water, and enough homes to contain all. It might look like a simulation but it is real. This could change billions of people around the globe.

The poor are being thrown at with dirt's of different kind, and I dislike it, I see people on the road dying, women in pain. But here, everyone is healthy and never sick. This a place where the poor, disable and the illiterates are taken care of and taught. Robots will take care of them at all cost. The cyber base has a force field which protects them from any attack, and redirect missiles, it has a garden full of flowers, a forest full of protective animals.

It has a defensive tall tower that protects and secures. Everyone has a pet which direct them and help them, and a service robot that does all for them. Every houses are mansions with pools and large environments. In there, I will construct their belief stronger in the mightiest God and help them in doing his will. They will not be lonely because they have each other and love one another like brothers and sisters. They will live happily without any problems. Their robots will be able to teach the illiterates and help and strengthen their knowledge. They are programmed to teach them any course as they please with steps. A school built for academics and helps in every knowledge. They are trained and helped in every aspect of life.

The cyber base, has electrically charged cars that can fly on air move on road and glide on water. The cyber base is the future of earth filled with AI but a place for the disabled, poor, illiterates and those with positive killing sicknesses. This is a place for only peace and harmony and one strong believe in God. They are many technologies that helps you to do things that you can't do. The blind is given vision eyes that able them to see not only in the morning but also in the night, the deaf are given hearing aids to help

them hear, the dumb are given a collar that helps them to talk through their minds. The disabled with missing body parts are replaced with strong robot parts.

In conclusion, I want to make everyone accepted, not only the rich that enjoys also the poor enjoys.
