

AN ESSAY

IF I COULD INVENT SOMETHING NEW

There are many inventions of people that pushed me towards inventing my own, inventions like Cars, Aeroplanes, Microsoft by Bill Gate, Robots, phone, light bulbs and many more.

Before I proceed, I would like to define what invention means, it is the ability to have new and interesting ideas. Involves being creative and focused. It's is what someone has in mind those things that haven't been in existence. Many inventors are being known today because of their creative intentions. The life of an inventor is not an easy one. First you have to come up with an idea that solves a problem in a way that no one has thought of before and then design to take it from theory to reality. The drive to discover the next big things that lies ahead of us in the mentality of an inventor.

Sometimes when I sit alone, I think of inventing something new that will be important to the world. One day I finally got an idea. I thought of inventing a phone, that if you call a person, he will appear to you and speak with you, you wouldn't touch the person, he will be in form of a spirit who you can see but can't touch. Before the idea of this invention; I thought of how it will be useful to the world because if your invention is not useful to mankind then it is not an invention.

My first reason for this invention is that people sometimes find it hard to recognize who they are speaking with. So, I came up with this idea that maybe if you calla person, you can see the person, speak with the person and know the right contact.

Secondly, if an occasion is been performed by two people from a far place. You can give the person a call and he will appear to you, and the occasion will be performed any waste of money or transport.

My final reason for this for this invention is when people talk over the phone, they sometimes find it hard to understand what the person means. There is a saying that we believe more in what we see than what we hear. When the person appears to you, you can show him or her whatever it is that you want to show him. After thinking of these things, I decided that if I am given an opportunity to invent something new, I will invent a phone with visible call. I also choose a name for my invention which is **(MILKY WAY GALAXY 6.3)**.

Finally inventing something new has been my dream ever since I was little and up till now. Carol Burnett once said "when you have a dream, you've got to grab it and never let go" Even it also seems impossible take note "Nothing is impossible, the world itself says I'mpossible "**I would do my best and NEVER GIVE UP** just like Thomas Edison.

Thanks
