

IF I COULD INVENT SOMETHING NEW

Invention is the act of producing or designing something that has not existed before. If I had a chance to invent something new which would be very beneficial for mankind it would be a flying car. In the past people travelled only on a horse or just on foot. After car was invented it changed everything radically. People started to use cars more than any other vehicle. Nowadays, cars are the most common means of transportation. The number of traffic jams has increased with the use of a great number of cars. Basically that's why I would like to invent a flying car.

Firstly, my invention would help to decrease driver's stress caused by traffic jams, as statistics show that traffic jams are increasing in big cities as well as small ones, especially during business hours when everyone is in a hurry to get to their workplace and unexpectedly encounter massive traffic jam. Some people would prefer to drive flying cars instead of ordinary cars. The combination of ordinary and flying cars can definitely help to get rid of traffic jams.

Secondly, in the result of this invention there could be decrease of car accidents. Sometimes people don't realize they violate laws and break the traffic rules because of a lot of reasons. They violate laws because they are in a hurry they are trying to overcome different traffic problems like road construction, narrow streets, crowd of people, etc. in my opinion there is only one solution to these problems. Flying car service should also be available.

Thirdly, cars have become the essential piece of our day-to-day conveyance. Going to work, doing groceries or just transporting from one place to another. I have many dreams. Generally speaking if I could invent something new, I would invent something that would create impact in our society which would be a flying car. Beyond the importance of cars in our everyday life and also the fact that the increase use of cars have resulted the increase of air pollution.

In conclusion, I would like to change this stressful atmosphere. Actually, people waste time in traffic jams instead of spending more time with their family or friends, it would be fun. We have often met with the concept of flying cars in science fiction of Hollywood films. Obviously, it is interesting and people would want to try themselves. This invention would be very beneficial for people to avoid stress and enjoy travelling.
