

IMMANUEL ANGLICAN ACADEMY

No. 34 Burma Road Sabon Gari, Kano, Kano State

NAME: PRECIOUS TOCHUKWU CHIJOKE

CLASS: JSS 2

ESSAY: IF I COULD INVENT SOMETHING NEW

I COULD INVENT A MULTIPURPOSE DEVICE/MACHINE

Multipurpose device is invented to reduce stress or an effort of human being, because it aids and help in household chores like sweeping, washing, cleaning, massaging etc.

Features of multipurpose machine

- Reduce stress
- Carryout household activities
- Organized / well produced

Multipurpose device has an advantages and disadvantages

An advantage of a multipurpose device are also the benefit while disadvantages are the bad effect of a multipurpose machine. It can also be called good and bad qualities.

Multipurpose devices will be very useful in companies, hotels, homes etc.

Advantages of multipurpose device:

- Multipurpose devices can carry out activities such as massaging and thereby save us from wasteful spending.
- Reduces stress
- Help in household chores
- Increases buying of the product
- Encourages inventors to develop new technology
- It lasts long

- Makes work easier and faster

Disadvantages of a multipurpose device

- It encourages idleness and laziness
- High cost of maintenance
- It increases unemployment
- It is expensive

Multipurpose devices will be very useful for disabled people such as:

- Cripple
- Deaf and dumb
- Blind
- Handicap

Moreover, this device should also be provided for pregnant women and women with children between 2 – 7 years old.

In addition, employing of maids is also part of wasteful spending when you can simply get a multipurpose device.

The multipurpose device will also replace some household electronics like

Washing machine

Refuse disposing machine (for picking and trashing of dirt in our homes and environments).

Instead of buying all these machines, you can choose to buy just one (Multipurpose device) machine that will take care of many things like:

- Sweeping
- Cleaning
- Moping
- Washing
- Massaging.

In conclusion, I would like to say that a multipurpose device will really be a helping hand to mankind. It is a form of ICT tool that has wide functionality that encourages upcoming inventors to create/invent something better than a multipurpose machine that will improve the standard of living and make life more comfortable and better. But the ugly part for it is that this machine is for city dwellers and also for the rich.
