

IF I COULD INVENT SOMETHING NEW

NAME: FLOURISH MARCEL

SCHOOL: EDUBASE INTERNATIONAL SCHOOL

CLASS: J.S. S 2

Invention is something that has never been made before, or the process of creating something that has never been made before.

An inventor is a person who invents, especially one who devises some new process, appliance, machine or article, one who makes inventions.

So many things has been invented by many people and in different years, like, *Thomas Edison* who invented light bulb in the year *1879* and then a later in *1880*, the Aeroplane was invented by the *Wright Brothers, Orville Wright* invented an airplane in the year *August 19, 1871- January 30, 1948* and *Wilbour Wright* invented an airplane in the year *April 16, 1867-May 30,1912*, washing machine was invented by *Jacob Christian Schaffer in the year 1767*. In *1913*, a refrigerator was invented by *Fred W. Wolf*.

If I could invent something new which would be very beneficial to mankind, I would invent “*A Flying Car*”. In the ancient days, people travelled on a horse or just on foot. After car was invented, it changed everything. People started using cars more than any other vehicle. Nowadays, cars are the most common means of transportation. The number of traffic jams has increased, that’s why I would like to invent a flying car.

Firstly, my invention would help to decrease driver’s stress caused by traffic jams. Especially, during business hours when everyone is in a hurry trying to get to their work place and unexpectedly encounter massive traffic jam. Some people would prefer to drive flying cars instead of ordinary cars. The combination of ordinary and flying cars would help to get rid of traffic jams.

More importantly, in the result of this invention, there would be decrease of road accidents. Sometimes, people don’t realize that they violate the laws and break the traffic rules because of a lot of reasons. They violate the laws because they are in a hurry, they are trying to overcome different traffic problems like road construction, narrow streets, crowds of people, to mention but a few. In my opinion, I suggest there is only one solution to these problems, flying cars should also be available.

I would like to change this stressful atmosphere. People waste time in traffic jams instead of that, they can spend more time with their family and friends. This invention would be very beneficial for people to avoid stress and enjoy travelling.
