

IF I COULD INVENT SOMETHING NEW

NAME: CHIBUNNA GIFT

SCHOOL: EDUBASE INTERNATIONAL SCHOOL

CLASS: J.S. S. 2

An Invention can simply be defined as the creation of new ideas, things and the bringing about of new innovations into existence. An inventor on the other side is someone who brings about the innovations of new ideologies into existence. As this life goes on, I have been able to realize that with the use of many inventories like Airplane, cars, washing machines, to mention but a few, life has been made a lot easier. So many different things have been invented in the whole world and this has really made and increase in the development of work.

Thomas Edison in the year 1847-1931, he invented light bulbs, electricity, film and audio devices. Alexander Graham Bell in the year 1876 at the age of 29, he invented telephone. Eli Whitney in the year 1765-1825 invented cotton gin. Other important inventions include:

- Archimedes (Archimedes screw, 3rd century bc)
- Johannes Gutenberg (printing press, about ad 1450)
- Evangelista Torricelli (barometer, 1643)
- Otto von Guericke (air pump, 1650)
- Christiaan Huygens (pendulum clock, 1658)
- Isaac Newton (reflecting telescope, 1668)
- Anthony van Leeuwenhoek (single-lens microscope, about 1670)

If I could invent something new, I would love to invent a Water-powered Generator. Frankly speaking, though it is a bit absurd, but I kind of thought long and hard before coming to this decision; the reasons are not far-fetched. It will probably decrease the rate of people's expenses on gasoline, petrol and other related sources. My invention will bring about happiness at different homes. In Nigeria my country, the major problem we are facing right now is the high cost of Petrol. It has really affected the people and the society at large since the supply of electricity is pretty much limited.

Students wear unironed school uniform to school; we experience high heat at night; transport fares tend to increase on daily basis and other related disadvantages with respect to high cost of petrol and fuel. But with the help of my invention, there will be no doubt that these limitations would be reduced and things might turn out for the better for the people and the society at large in all ramifications. Thanks.
