Essay Topic: IF I COULD INVENT SOMETHING NEW

Invent can be best define as the act of creating thinking, imagining, and building of materials,in order to use it for it's beneficial purposes.

Firstly, I would like to invent a recycling bin,that has a shredder and shred dirt into smaller pieces.The recycling bin would be made of Rubber and metal,it will be designed with a logo Symbolizing Cleanliness, it will also have Shredding machine inside it,so when a person passes by and trow in a dirty nylon or paper into the recycling bin it will be shredded Instantly, doing this will make the environment neat and tidy.The Shredded waste such as nylons and cans can be used for art work and decorations on special occasions.

Furthermore, other Shredded material like leather can be use to patch up torn leather bags or shoes when repairing or sewing them.

The importance of this recycling bin is to make the environment neat and tidy. dirtiness is one of the ills among many countries,and I think this recycling bin can be the solution to the ills in the country and make Nigeria our country and other countries a neat and tidy environment and a better place.
