

Name: Toluwalase Emmanuella Blessing

Class: Year 7 Diamond

School: Imperial Lights College

### **IF I COULD INVENT SOMETHING NEW**

Invent means to create something no one has ever made, that will be useful for the communities. If I could invent something new, I would invent a portable device that can turn dirty water into safe drinking water. This device would be small and lightweight just like a school bag size. It will be easy to carry all around.

This device would be powered by sunlight. It will have a strong lasting battery. It will filter out all dirt in the water leaving behind clean and safe drinking water.

The device will be useful to individuals who do not have access to clean water. Remember drinking dirty water can result in illness. With this device, people can always access clean water, making life better for everyone who uses it.

Finally, by inventing this portable device, it will change the world for the better. I aim to play a part in establishing a world where every individual has access to safe drinking water.
