**CLASS:** JSS3  
**SCHOOL:** UMBRELLA COMPRHENSIVE HIGH SCHOOL 2/4  
SALAWU LAWAL STREET, OLODI APAPA, LAGOS.  
**TOPIC:** IF I COULD INVENT SOMETHING NEW

**If I could invent something new, what will that be?**

This is a very creative question.

First of all, **what is invention or invent?** Invention means the thinking of a new idea and inventing of something that did not exist before while invent means to think of and plan something completely new that did not exist before.

- If I could invent something new, I will like to invent something that will be beneficial to all a thing that is good, helpful, useful, lifesaving and more.
- If I could invent something new, I will invent a human robot, that does operation on human being.

What is robot? A robot is a machine that does work instead of a person.

What is a machine? A machine is an instrument made up of many parts used to do work.

History has proved that great invention has always been made in emergency situations.

Robot mostly do repetitive task and very consistently for very long durations without interruption or any need for human interactions. My inspiration was brought about by my role model **Thomas Addison**. In the creation of bulb, it took **Thomas Addison** 1,000 unsuccessful attempts before he created the first bulb.

*Things that have been invented and has really helped us a lot include;*

- **Computer** by **Charles Babbage**
- **Napier Bones** by **John Napier**

- **Telephone** by **Alexander Graham Bell**
- **Bulb-Light** by **Thomas Addison**
- **Aeroplane** by **Wright Brothers (*Wilbur and Orville*)**
- **Bullet Proof** by **Stephanie Kwolek**

The first digitally operated and programmed robot was invented by George Devol in **1954** and was ultimately called the unimate.

The thing that brought about my inspiration is that I want to be a nurse, cause in Nigeria we have poor health services. Some people that call themselves nurse and doctors nowadays do not know what they are doing.

I would invent a human robot in the sense that it is a robot but perform the work of human being.

In Nigeria people are dying everyday due to poor health services in the country. In countries like Nigeria most people fly out of the country for the surgery, because we don't have the appropriate tools, doctors or nurses for the surgery.

Our health is supposed to be our number 1 priority.

If the government can train professionals and open more health care centers and provide all the right apparatus than, our country can be safer.

Remember, that health is wealth.
