**SCHOOL: LAND OF GOSHEN INTERNATIONAL COLLEGE, AWKA, ENUGU STATE**

**TOPIC: IF I COULD INVENT SOMETHING NEW**

If I had a chance to invent something new, it would be a flying car. In the past, people travelled only on a horse or just on foot, after car was invented, it changed everything radically. People started to use cars more than any other vehicle.

Nowadays, cars are the most common means of transportation, the number of traffic jams has increased with the use of a great number of cars. Basically, that's why I would like to invent a flying car.

Firstly, my invention would help to decrease driver's stress caused by traffic jams. As statistics show, traffic jams are increasing in big cities as well as small ones, especially during business hours when everyone is in a hurry trying to get to their workplace and unexpectedly encounter massive traffic jams. Some people would prefer to drive flying cars instead of ordinary cars, the combination of ordinary and flying cars definitely would help to reduce traffic jams.

Secondly, in the result of this invention, there could be a decrease of car accidents. Sometimes people don't realize that they violate the laws and break the traffic rules because of many reasons. They violate the law because they are in a hurry, they are trying to overcome different traffic problems like road construction, narrow street, crowds of people, etc. In my opinion, there is only one solution to these problems, flying car service should also be available.

And finally, it would be a fun. We have often met the concept of flying cars in science fiction in Hollywood movies. Obviously, it is interesting and people would want to try it themselves.

Furthermore, I would like to change this stressful atmosphere. Actually, people waste time in traffic jams instead of that they can spend more time with their family or friends.

In conclusion, we know how expensive it is for our government to build roads, we spend years constructing a bridge. As an example, I would say about my district, which is very close to each other however, we can't transport ourselves there quickly because of the river, which is supposed to be cheaper but a flying machine, you don't need to change tires, repair suspension and other attendant details, of course, there would be other components. This invention would be very beneficial for people to avoid stress and also enjoy travelling.
