

ESSAY: IF I COULD INVENT SOMETHING NEW

NAME: OBIADINMA CHINENYENWA

CLASS: JSS1F

SCHOOL: UNIVERSITY OF NIGERIA SECONDARY SCHOOL, ENUGU CAMPUS.

Blaise Pascal, Charles Babbage, John Napier; all these great inventors invented things that are beneficial to human life. Then I wonder, if I could invent something, it would be a portable water dispenser for kids.

Everyone must have had a water dispenser but this one is portable, you can carry it anywhere you are going. The major use of this water dispenser is that it keeps a family clean, healthy and hygienic. It is easily affordable and environment friendly.

Most of the world's plastic has been polluted by dirt and land pollution, but this water dispenser keeps us safe from dirty water. Water dispenser is a safe and affordable way to keep your family safe and healthy and what better way to keep you and your family safer than to have a portable water dispenser.

A water dispenser helps us in this our daily life. Without this water dispenser the water we would be drinking now will be dirty. Water dispenser improves our lives today. The method to creating a portable water dispenser. Materials needed are wood, plastic bottle, straw, brown wood, pen/maker and gum.

Process: Cut the wood into four long medium parts and use your gum to glue it like a cuboid then you get any plastic bottle of your choice and make sure it is clean, cut a hole two inches from the bottom, put your straw and use your gum to stick it in place. Cut out a small square sized wood and glue it in the middle of the cuboid. Then glue the bottle on the square and create a hole for the straw to pass through, the other space left from the cuboid, stick a rectangular shaped wood at the bottom, bring a small cup and open the top of the bottle and enjoy your germ free water.

Water dispenser does not take much space in your house, it is easily affordable and environment friendly. Water dispenser keeps the family safe and disease free. This portable water can be used for our kids to keep them healthy and hygienic. It can also be used by an adult.

If you did not budget to buy a water dispenser you can easily make a portable water dispenser for you and your family.

A portable water dispenser can easily be carried everywhere you go and if you are thirsty, you can easily get water from your portable water dispenser.

Water dispensers are one of the things we can use to save our plastic from being polluted and to prevent pollution.

Water dispenser not only promote healthy and sustainability but also offer unparalleled convenience and accessibility.

In conclusion, access to clean water is paramount for preventing water borne disease. Contaminated water sources harbor pathogens that are significant risks to public health by contrast. Water dispensers are important in our lives.
