**ESSAY: IF I COULD INVENT SOMETHING NEW**

If I had a chance to invent something new which would be very beneficial for mankind it would be a flying car. In the past people travelled only on a bicycle, canoe, boat, horse or just on foot. After car was invented it changed everything radically; people started to use cars more than any other vehicle. Nowadays cars are the most common means of transportation. Millions of people drive cars everyday on the road and it has become a necessity. The number of traffic jams has increased with the use of a great number of cars. Basically, that's why I would like to invent a flying car.

Firstly, my invention would help to decrease drivers stress caused by traffic jams that are increasing in big cities as well as small ones. Especially during business hours when everyone is in a hurry trying to get to their work place and unexpectedly encounter massive traffic jam. Some people would prefer to drive flying cars instead of ordinary cars the combination of ordinary and flying cars definitely would help to get rid of traffic jam.

Secondly, in the result of this invention there could be decrease of car accidents. Sometimes people don't realize that they violate the laws and break the traffic rules because of a lot of reasons. They violate the laws because there are in a hurry, they are trying to overcome different traffic problems like road construction, narrow streets, crowds of people, etc. In my opinion there is only one solution to these problems. Flying car services should be available.

And finally, it would be fun when driving in the sky and also a joyful ride for everyone. It will be very exciting. We have often met the concept of flying cars in science fiction or Hollywood films. Obviously it is interesting and people would want to try it themselves.

In conclusion, I would like to change this stressful atmosphere. Actually, people waste time in traffic jams instead of that they can spend more time with their family or friends. This invention would be beneficial for people to avoid stress, enjoy travelling and also solve the problems of parking space. So to develop it will solve a lot of problems to humanity at large.
