

NAME: UZOESHI JESSE

SCHOOL: ABBOT DAYSPRING SCHOOL (LAGOS STATE CAMPUS)

CLASS: JSS 2 DIAMOND

TOPIC: IF I COULD INVENT SOMETHING NEW: A TIME MACHINE THAT LOOKS LIKE A DOOR

A Time machine is a machine that can enable someone to travel through time to the past and future. It can also be defined as a device that can transport an object or person back on time or into the future. You may think it was a watch first but it is something much cooler. The invention of a time machine would make a significant change in the way we perceive history and the world around us. Imagine being able to witness historic event such as the signing of declaration of independence or the construction of the Great pyramid of Giza first hand. This technology will provide a unique opportunity for researchers, historians and students to experience the past that was previously unimaginable.

By the invention of the Time Machine, people like researchers can study the mistake and successes of the past, individuals could make more informed decisions and potentially alter the course of history for the better and benefit of man. The device could be used for educational purposes, allowing students to learn about historical events in a hands-on and immersive way. It will enable them to learn in a way that is unimaginable to us. It will help improve human life, improve the society and benefit the nation.

Furthermore, a Time Machine could have significant implications for the future. It will also pose numerous challenges and ethical considerations. One of the main concerns is the potential for altering the past and creating paradoxes that could have unforeseen consequences. Additionally, there is a question of would control access to this technology and how it will be regulated to prevent misuse. However the Time traveler may encounter various problems like losing of belongings, fear and anxiety because he/she is not sure of the destination that they are going to reach. Some may even have nutritional; problems and lack of area identification but the problem aren't much.

There are some advantages of time machine, for example; we can learn observe the evolution of human beings. We can find out whether the weather some of the great stories which we listen from our childhood are true or not. We can watch some great event that happened in the past. We can solve some famous mysteries like the great Pyramid of Egypt. We can also witness significant events firsthand. If we will go in future then we can see that what are fault we will do in the future and we will do hard work to not see that future.

In conclusion, the invention of a time machine as the potential to revolutionize our understanding of History and provide Unique Educational opportunities for future generations. While there are significant changes and ethical considerations that must be addressed, the benefit of such an invention are vast. As we continue to push the boundaries of technology and scientific discovery, the concept of time travel remains a fascinating and tantalizing possibility
