NAME: ALANEME CHINWENDU

CLASS: YEAR SIX

SCHOOL: PRINCE CHARLES INTERNATIONAL SCHOOL

TOPIC: IF I COULD INVENT SOMETHING NEW

If I am to invent something new, I will invent a new App. An app is a piece of software that you can download to a device such as a smartphone or tablet for example to source for information, play game or watch films. An app can be used to do many things like watching of videos, playing of games, sending messages and can be used in typing like in Microsoft word.

There are many Apps in use, but mine will be used for many things such as games, watching videos, downloading film, reading of novels or stories, messaging. It can also be used either online or offline, that is if your video, film or music is downloaded.

I would name the app "Everything Everything". Why I would call it that is because the app contains almost everything needed in a phone. And it is a special app because you don't need to download many apps again.

I want to create it because of my dad firstly, he tells me that women are not common in this field. I want to proof it to him that me and other girls can do anything they want when they put their mind to it. I want him to know that I can do what I want to do.

Secondly, there are many girls who have been denied opportunities just because they are girls. Some girl's family and their peer friend do not encourage them, instead of that they make them to give up.

Thirdly, when I see order people who invented apps like Mark Zukerberg who invented Facebook, Whatsapp and many other app, I use to be motivated and dedicate on what I want to do. And I want to be like them or even better than them.

I started preparing myself by reading, researching, watching educational videos and jotting down. I have started been serious and dedicated. I am also getting my grade better thereby proving to my dad that I am serious in what I want to do.

What motivated me to be a programmer of an App was that when I see others who created app and people say they want to be like them, I think of it in my own way "what if other people want to be like me", so I kept on to that target on being a programmer of an App.

To conclude this, why I want to become a programmer is because, I want to be an example, and also to proof to my dad that I can become what I want to be.

Thank you.
