CLASS:

JUNIOR SECONDARY SCHOOL 1

TOPIC:

**IF I COULD INVENT SOMETHING NEW: IT WOULD BE A DEVICE
CALLED LIETRACK DETECTOR**

If I had a chance to invent something new, which would be very beneficial for mankind, it would be a device called Lietrack. If this device has been made by me, our country would have improved and we won't find most nigerians suffering and living below the poverty line.

A wearable device that monitors political aspirant's commitment of improving citizens standard of living could be a game-changer in promoting accountability and transparency in politics.

MY DESCRIPTION:

Lietrack is a device that tracks and analyzes a political candidate's policy proposals, debates and campaign promises related to improving citizens standard of living. it uses powered mechanism to assess their commitment to key issues like education, healthcare and social welfare.

FEATURES:

SPEECH ANALYSIS: Political analyzes a candidate's speeches and debates to identify key words in sentiment analysis related to standard of living.

POLICY PROPOSAL: The device accesses the potential impact of a candidate's policy proposal on citizens.

CAMPAIGN PROMISE TRACKING: Lietrack monitors candidates campaign promises and track their progress in fulfilling them.

VOTERS: The device allows voters ask questions, engage with candidates directly, promoting transparency and accountability.

SCORE CARD: lietrack generate score -card for each candidate, providing a comprehensive overview of their commitment to improving citizens standard of living.

BENEFITS:

DECISION -MAKING: Voters can make decision based on a candidates commitment in improving standard of living.

TRANSPARENCY: The device provides a clear and accessible way to evaluate political candidates commitment.

This concept is a starting point and the development of lietrack require collaboration with experts in political analysis and wearable technology.

However, the potential impact of such a device is significant and it could lead to more informed and engaged citizenry.

Our current leaders, they violate the rules and regulations of law by their own selfish interest, convetousness, greed, to spoil our great nation, Nigeria of today. Causing hardship for the citizens with high inflation in the economy.

If my invention as already been in place, we would have known whom to vote for in the last general election between Bola Ahmed Tinubu, Atiku Abubakar and Peter Obi, that would make Nigeria great again, because of high price of fuel, everything in Nigeria is too expensive for some citizens, so they die ultimately death.

If i have invented something like this ,we won't suffer, my device is going to help save the nation and it is going to be a normal place as it was before. That we citizens don't have access to good economic growth, good health care, quality education, housing facility, agricultural facility, and access to essential commodities. my machine would have granted the citizens of Nigeria a better life, good standard of living, and better management of our natural resources by the government.

At this point, some citizens would wish they have the power or knowledge to read the minds of the political aspirants before being elected to the office to rule as a leader.

Thanks in anticipation.
