**CLASS: J.S.S III**

**ESSAY TOPIC: IF I COULD INVENT SOMETHING NEW**

If I could invent something new, it would be something we really need in the community. E.g. water car which uses water instead of petrol, teleporting machine which can take you to anywhere in the world. But for me I identify what I want to invent through my imagination which is a machine that can style, plait and clean hair, which I call the hair sterilizer.

Firstly, We need machine to make hairs which is very useful because 80% of women in the world have problems making their hair because of the length which cost them a lot of money and stress.

Secondly, Some hair get infected by thick and lice which can cause infection because it sucks the blood which needs some special treatment to cure it and this machine will be able to cure it with its own remedy. After that it'll need some washing to remove the lice and ticks from the hair.

Thirdly, The hair stylizer is going to be very expensive because of the qualities and strength of styling would cost a lot of money because of stress and to get legal from the government and the necessary details from the laws and we also test it on some people.

To sum up we'll need some partnerships for the project, I strongly believe this invention will be a good project with good partnership and with benefits for our society. Education for hair stylist and engage more people to make hair grow more.
