

NAME: DIELE BEYONCE NGOZICHUKWU
SCHOOL: SONIKA INTERNATIONAL SCHOOLS
CLASS: J.S.S 3
TOPIC: IF I COULD INVENT SOMETHING NEW

As a good and ambitious citizen of Nigeria, I would like to invent something new that would help develop Nigeria and Africa at large and be helpful to all in the world. Everybody in the world wants to stand out from the crowd and be known for one thing or another invented, so I cannot be excluded from being one in the future. According to the Oxford Dictionary, invention is the act of inventing something that has never existed, and I would like to invent something that has never been invented. Some people have the idea of something new but have never had the chance to invent what they have imagined; that is why I would like to write mine out so as to remind me of my objective.

I would like to invent **an advice machine** that will advise everyone to be law-bidding, and the government of Nigeria in particular, on how to enforce law and order in our country. Each time I look at Nigeria and the government, I see no positive changes. Since the Presidency, members of the House of Assembly, members of the House of Representatives, and so on, cannot give the past presidents of Nigeria and the incumbent president an idea or advice on economic policies that will make the economy of Nigeria stable, with my invention, this will be made possible. It is disheartening to imagine that Nigeria's president cannot make the price of things go down, let alone stop kidnapping, prostitution, killing, organ harvesting, and Yahoo Plus, as it is being referred to. We see criminals go scot-free after committing severe crimes simply because corruption has become the order of the day in Nigeria. If I could invent this device, I would ensure it has a voice mechanism—the voice that will speak peace, unity, and justice—to foster growth and development in Nigeria in particular.

Some people may think that I am stupid to imagine this kind of invention and that it will never come to pass. Some may think that I am hallucinating. Each time I tell people about this idea, they laugh at me mockingly, telling me that the government will not accept it in Nigeria. Notwithstanding, I am living with the passion to restore the lost hope of Nigerians with my invention, so that life will not be reduced to a burden.

Nigeria is like a pregnant woman with a lot of children that have great plans and a future; so, for Nigeria, which will soon give birth to beautiful creatures, my invention will go a long way towards fulfilling this dream.
