**TITLE: IF I COULD INVENT SOMETHING NEW**

The beginning of a dream is a place of determination. There are so many things that are created and about to be created. But for me I will love to make something extraordinary even the archeologist or scientist cannot even think of.

If I had the chance to invent something new which would be beneficial to mankind, it will be a flying car. In the past, people travelled by Horse back or foot. Later, car was invented and it changed everything radically. People started using cars more often than any other vehicles. Nowadays, cars are the most common means of transportation. The rate of traffic jam has increased with the use of cars. Basically, that is why, I want to invent a flying car to reduce traffic.

Firstly, my invention will help decrease driver's stress caused by traffic jam. As it is seen, traffic jam is increasing in big cities as well as small ones. Especially, during business hours when everybody is in a hurry to get to their various work places and unexpectedly encounters massive traffic jam.

Also know that everything that has an advantage also has a disadvantage. Flying cars also have some disadvantages like collision with other flying cars, accidents in the air and also destroying the Ozone Layer with smoke. Some people will prefer using flying cars instead of ordinary cars.

Secondly, in this result of this invention there can be decrease in car accidents. Sometimes people don't realize that they violate the laws and break the traffic rules because of a lot of reasons they violate the rules because they are in a hurry trying to overcome different traffic problems like road construction, narrow streets, crowds of people e.g. In my opinion, there is only one solution to this problem. Flying cars service should also be available for emergency and urgent needs.

And finally, it would be fun if we have often met the concept of flying cars in science, fiction and Hollywood films. Obviously, it will be interesting and people will love to try them. Flying cars have been used in films like Harry Potter, Justice League and some other films and this is a dream that can become a reality if we join hands together to achieve our goal.

In conclusion, flying cars can improve the economy in all ramifications and provide solution to many problems we face in our society today.
