Topic: "If I Could Invent Something New"

If I can invent something new, I would invent the "Biggest Money-Making Machine" and this is how it will work. I will put plain paper into the machine and it will automatically turn into money. I thought of this idea because I always hear that you cannot pluck money from a tree, that you have to work for it. So, I thought instead of working for the money, why don't I make or invent "A money making machine" to make work easier and so that your money will not be able to finish easily. It will make life easier for everybody in the world and they do not have to work only the thing they need is just a piece of paper and it will turn into money. So, imagine having 20 pieces of plain paper or normal paper it will turn into 20 pieces of money and the machine can give you any amount of money; two hundred naira, hundred naira, five hundred naira, one thousand naira, ten Naira, fifty naira. It just depends on the kind of paper you put inside the machine. This is how it will work: I will put on my socket and plug the charger of the money-making machine. Then I shall input my paper and then money will be coming out of the machine.

The reason I am writing about money making machine is to improve Nigeria, to make her a better country and I want to help those who are in need of money. For instance, people who work as slaves and are maltreated by their masters or mistresses would be set free by financial assistance given to them through my money making machine. I will not only invent this machine, I will invent them in a very large quantity so that it will be easily available to as many people as possible. It will give you twice the money you put into it. I am writing this essay about money making machine so that I can improve our money making machine into an improved, modern and updated for better living.

The conclusion of my money-making machine as a new invention is that I will become one of the saviours of the world, a saviour that must be reckoned with.
