IF I COULD INVENT SOMETHING NEW

In inventing something new, I would like to start with my country Nigeria and I would invent a cell phone that would be able to do many things other cell phones can't do and I would like to state my reasons.

My first reason is because it would help to communicate with family and friends. And I can call people and send messages and email. For example you are expecting someone any you've not seen him and you call him and he says he is Mile 2 while he is in Wilmer well, the cell phone I am going to invent would send his location and you will know that he is lying.

Secondly, it will help me with my school subject. For example I can search internet, find information quickly and do my study project without buying data.

Thirdly I can use it to take picture record videos and enjoy interesting games listening to music and watching useful videos using this magical gadget.

Finally my cell phone cannot be used by yahoo boys to fraud people and also people won't be able to use it to watch pornography, these are the reasons why I want to invent my cell phone.
