IF I COULD INVENT SOMETHING NEW.

In a World filled with unending challenges like ours, invention is inevitable as inventors with the help of Technology seek to solve the problems and the rising needs of Human race and in a bid to bridge this gap, I would invent a device/machine with numerous benefits to mankind thereby meeting their needs Economically, Socially, Mentally and otherwise.

If I could invent something new, I would invent a device/machine that will reduce the rate of current deaths and totally minimize or eradicate Health related issues in our Society considering the number of death reports we receive frequently especially on unavoidable deaths. This device will increase life span by way of elongating it to over Two Hundred years; meaning that you will have additional One Hundred and above to live a fulfilling live. It has the capacity to detect and correct decline/failure of vital body organs such as the Heart, Liver, Kidney, e.t.c; thereby keeping you in shape and medically fit.

You can only socialize when you are healthy, intact and active and this translates to high productivity in Labor workforce, increase and growth in our Economy as only physically and mentally stable people can work effectively even at old age. There will be no fear of losing a loved one to any Health-related problems since the device shows and handles all ailment. People can actually prepare for eternity because they will have fore knowledge of their demise and people will no longer collapse, have low and high blood pressure issues or even Cardiac arrest. With the use of this device, Our Hospitals will no longer be jampacked because this device seeks to do more than half of their jobs with little effort in place.

The device will be accessible and affordable in various sizes and prices in such a way that the mobile/portable ones can be carried about while the ambiguous ones can be stationed in places like our Offices, Churches, Hospitals, Schools and recreation centers. It will be designed with simple languages and buttons that even the uneducated can operate them with or without assistance with the help of the User's guide. A healthy life is relevant in our society and has the opportunity of living life to its full meaning and purpose.

The popular saying that Health is wealth has helped me in buttressing the enormous advantage and positive impact this device/machine will have on Humans and the general development of our Country and the world at large as it can not be over emphasized.
