

## IF I COULD INVENT SOMETHING NEW.

What does it mean to invent? To invent means to create something which has never been made before.

Therefore, if I could invent something new, it would be A: DRESS UP MACHINE.

How would it work? It would be in form of a robot that I can instruct or give command to, in order to carry out what I want.

The first thing I would tell the robot is the event or occasion I would like to attend.

The second thing I would ask the robot to do is to go to my wardrobe and select the best clothe for the occasion.

Then, I will undress and it will dress me up and after that, I will go to the mirror to check if it is okay. If it is not okay, I can now tell the robot to rest and I would do some make up to beautify my face when I am done, I will take my bag, wear my shoe and start going.
