

ESSAY TOPIC: IF I COULD INVENT SOMETHING NEW

NAME: JOHNSON OLUWADARASIMI

SCHOOL: HONEYLAND COLLEGE, IPAJA, LAGOS

CLASS: JSS 1

INVENTION: PORTABLE SOLAR POWER BANK FOR LAPTOPS

I have always wondered what it would be like to be called an inventor. I Johnson Oluwadarasimi would like to invent a **PORTABLE SOLAR POWER BANK FOR LAPTOPS**.

More people are using laptops daily for work, in schools etc. and a portable solar laptop power bank will ensure that laptops are always on, as people go about their day-to-day activities.

My invention is about creating a **portable** solar laptop power bank that will be easy for people to move about with. The power bank will be about the size of a smart phone so that it is convenient for people to take around. The portable solar laptop power bank would be a **small** device that gets its energy from the sun. The battery capacity will be high so that it can last long.

The benefits of the portable solar laptop power bank are

1. Energy from the sun is environmentally friendly
2. The portable solar laptop power bank will be easy to take around
3. It will be useful for people who are on a trip and may not easily find a place to charge their laptops.
4. It will be useful for people who work in rural areas where there is no electricity. All they need to charge the laptop is energy from the sun that will charge the power bank.

In conclusion, I want to create a better world for humanity to live in. Creating a better world means creating a better society for all humans on earth and one of the ways this can be achieved is through the use of renewable energy. If we keep adding new inventions into thinking process, then we can achieve more than we ever had. Let's create a bright future.
