

## IF I COULD INVENT SOMETHING NEW .

If I could invent something new it will be a compass watch for the blind. Just want to tell a brief story about my life. My Name is Enuwa Princess Chinecherem, I am thirteen (13) years old. I am a student of Queens School ,Enugu in junior secondary school two(JSS2D). I am from Ozom-Aguobuowa in Ezeagu Local Government Area, Enugu State.I grew up with my grandparents in the village,it wasn't that easy for them to provide food because of their age. But as years goes by due to lack of financial support ,my grandfather lost his sight because of there was no money to take him to the hospital when he was sick. I was a little older then , I worked day and night in other to earn a living and make him not to regret being alive which wasn't that easy for me. Lost of his sight lead him to his grave because he was unable to see the intruder's that broke into our house. I cried to the extent that I lost hope of survival and wished to die with him. That is the main reason I wished and have always been working hard in other to invent a compass watch for the blind.

These are the uses of the compass watch for the blind.

It can be used to indicate presence of a living thing.

It can be used for direction to any where they want to go to.

It will help serve as a companion to the blind because it will have the ability to play music and to answer calls. It would not need any physical touch to access it , but with your voice you can do it all. It tells you the time through the speaker/mouth piece.

Importance of compass watch for the blind to the society.

- (1) It will aid in distribution of information and also facilitate communication since it can make calls.
- (2) Having a companion is what everyone needs, with it companionship is guaranteed because it can play music.
- (3) It will tell them weather there is any danger nearby.
- (4.) It can do two things at a time like you can talk to it and ask it the time and it will respond back to you.

With it , the blind can cope up with life just like others and they would not feel cheated. A Compass watch is what I want to invent hoping that it will be useful to the blind and the society

Thanks

Enuwa princess Chinecherem.

Jss2D Queens school Enugu.
