

## **IF I COULD INVENT SOMETHING NEW**

**If I could invent something new I will invent an AI Referee. This AI Referee would bring a big change to humanity. Imagine that an AI Referee is invented it will be of so much use to the world in various aspects, both in Sports, Schools and Politics.**

**In terms of Sports, An AI Referee will contribute to the growth and development of sports. In sports like football, an AI Referee will be of great importance. In football, before the introduction of VAR (Video Assistant Referee) there was only one referee on the field with the lines men. There were so many mistakes. For example, the 1886 FIFA World Cup Final between Argentina and England where Diego Maradona scored a goal with his hand and it was widely known as “Hand of God”. But with this AI Referee that error will definitely be seen. Even in sports like basketball, some fouls like “Travelling” would be spotted by an AI Referee. Some human referees are bribed to favor one particular team but this AI referee cannot be bias or bribed in its judgment.**

**Apart from sports, an AI Referee or Invigilator will be very important in the education sector. During an Examination in schools, an AI referee or Invigilator will be useful in reducing the rate of Exam Malpractice. When examination malpractice is being practiced, an AI Referee will sense it even though some human invigilator won't see it or they are bribed to allow exam malpractice but an AI referee will be strict in its invigilation.**

**Also in the world of politics, an AI Referee or Supervisor will bring a very big change. An AI Supervisor will be in charge of elections processes and ensuring that there is no issue of election malpractice. When some human Supervisor is in charge of election, they make mistakes or are even bribed to make wrong decisions or to elect the wrong persons into power. The consequences of their actions cost the future of the society's economy leading to hardship and suffering. But with this AI Supervisor, the right people will be elected and elections will be free and fair.**

**Moreover, people will say that this AI Referee or Invigilator can be hacked. That is not far from the truth, but this AI Referee will have a security package that will make sure it can't be hacked or probably infected with virus attack.**

**I would definitely like to invent an AI Referee because it will bring a very big change to humanity.**
