

"IF I COULD INVENT SOMTHING NEW" BY KEMDIRIM OZIOMAKAMJIBIA LOVE.

Numerous inventions have been made over recent times which has been of great benefit to the world, but a very important one is yet to emerge. Imagine a world where human problems are settled as a result of a mechanised chip. If I am availed the opportunity and resources to create a device (invent something new), I will make a machine that harnesses human imagination which will make the world a better place. My invention which I call UNITY GENERATOR of understanding, care and compassion will be a game changer for the discord, schisms and disagreement between people.

The engine will be more like a chip that beams and spreads love amongst people. It will be made of metal that appears very light but as powerful as you can't imagine. An undefeatable technology generated by electricity and filled with so much love and affection, always ready to settle any form of disunity. "Unity Generator" will have a diamond shape that aids it's glittering and makes it shine like rising stars. The engine will be a little substance that moves around the globe searching for disputes to settle. It will be powerful and unbreakable and will always make it's way to the heart of every individual.

My device will assist in stopping the wars in some countries and help military officers know the intensions of invaders. It will also bring concord amongst members of a society who may likely encounter disagreement. Since the chaos in most countries are increasing, I believe that the "Unity Generator" can serve as peace fosterer during battles. Imagine a situation Where people, communities or even countries who always had issues begin to co-operate and work as a team given the help of UNITY GENERATOR. This device will not only assist in terminating all human disharmonies, animosity and vendetta but will also ensure that there is global peace and understanding between and amongst nations of the world.

UNITY GENERATOR will sufficiently align with the world's quest for globalization(oneness). Every human mindset will change into positive disposition on global dashboard or scale. Fighting amongst people and nations will relatively be and sooner than later becomes a thing of the past.

By God's grace, I strongly believe that my invention will be an atmosphere of unity to the world. It will return co-operation amongst members are of the society. This device will foster into men the spirit of and care and compassion; empathy, trust, love and unity, instil in people the spirit of endless effort to working together, thus making the world a better place.

Student's Details:

Name: KEMDIRIM OZIOMAKAMJIBIA LOVE

Class: JSS 2

Age: 12 years

School: Lighthouse Startright High School

Parent's/guardian's

Parent's phone number: 08033361212

Email:barkemdirim@gmail.com
